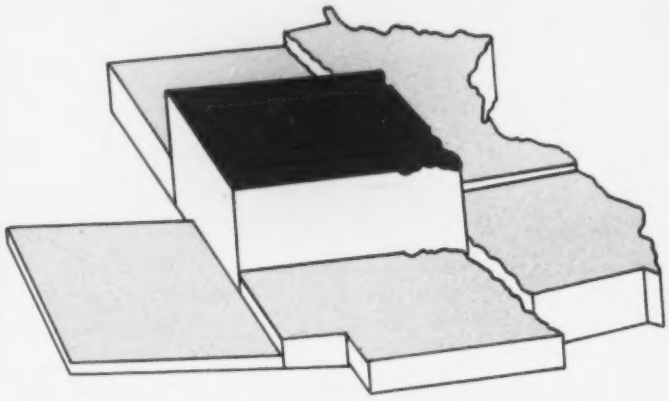
SOUTH DAKOTA Data Supplement

September 1988
Vol. V, No. 4



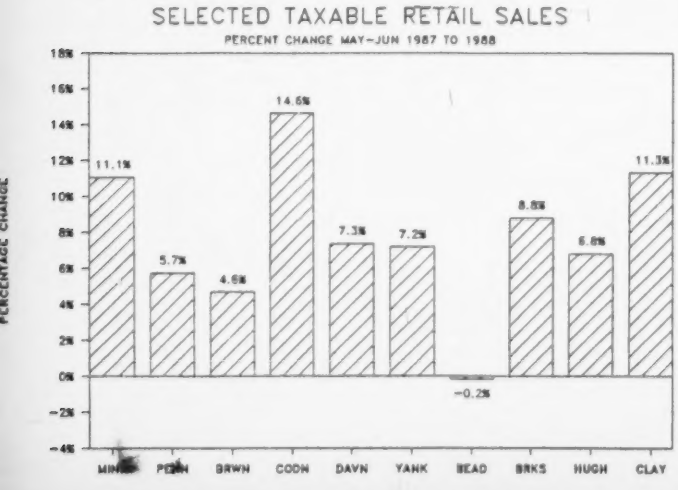
Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA RETAIL SALES INCREASE 7.5% IN MAY-JUNE BIMONTHLY
* RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN STRENGTH
* SALES IN THE MORE RURAL COUNTIES UP 5.7%

By Randall Stuefen

The state's retail sales increase this bimonthly duplicates the 7.5% increase recorded last bimonthly. The 7.5% growth rate of the past two bimonthlies exceeds the 5.8% and 6.0% national growth rates in the same periods. The state's performance has exceeded the national retail sales growth rate in four of the past six bimonthlies.

The effects of drought do not show up in the May-June sales. Next reporting period will provide the first indication of the farmers' response to the adverse climatic conditions, good prices for stored grain, stabilizing land prices and the government relief programs. The cumulative impact of all the market forces affecting the farmer and his buying decisions is not clear. Sales performance has weakened in the rural counties over the past three bimonthly reporting periods. However, the performance remains respectable with the 5.7% increase of this bimonthly very near the national growth rate of 6.0%.



The performance difference between the urban and rural counties this reporting period is in the sale of goods. The increase in the sale of merchandise is 5.9% for the urban counties and 2.0% for the others. The sale of services for both groups is nearly the same—10% for the urban counties and 9.5% for the rural counties.

In the top ten counties, the sale of building materials is up 7.7%. General merchandise sales (department store sales) are up 21.1%. Apparel and accessories increased 6.6% from a year earlier. Furniture sales increased 17.9%. Grocery store sales are down −5.6%. Stores classified as selling miscellaneous shopping goods (specialty shops) have decreased sales of −6.2%. The hotel and motel services for the top ten are up 14.1%. The first six months of 1988 were good to this industry showing double digit growth throughout. We will monitor this group to see if the impact from the Black Hills fire is conspicuous. Continued on page 8.

BIMONTHLY PERIODS	JUL-AUG 1987	SEP-OCT 1987	NOV-DEC 1987	JAN-FEB 1988	MAR-APR 1988	MAY-JUN 1988

TRENDS IN THE SOUTH DAKOTA ECONOMY

By Trent Stowater

The following two graphs show the State of South Dakota being compared to the U.S. The data that is being shown is gross national product (GNP) of the U.S. and gross state product (GSP) for South Dakota measured in 1982 dollars. The first graph shows the per capita output for both the U.S. and South Dakota. Examination of Figure 1 indicates that South Dakota generally has the same pattern as the U.S. with a lag. South Dakota has been growing at a faster rate than the U.S. over this time period. Even though South Dakota is growing at a faster rate, the U.S. still has a higher per capita output than South Dakota.

The second graph shows the percentage change in output for both the U.S. and South Dakota. South Dakota has larger swings in the percentage changes than the U.S. For the most part, South Dakota is in the same percentage change range but not always following the same pattern as the U.S.

The last two graphs show farm output and manufacturing output as a percent of the total. Farm output starts out around 20% of the total output. It stayed at this level until 1975, with a high being in 1973 of close to 22%. After 1975 the percent took a sharp drop; this was the drought year of 1976. The manufacturing graph indicates that manufacturing as a share of total output has been steadily increasing. Currently, manufacturing makes up 11% of the total output in South Dakota.

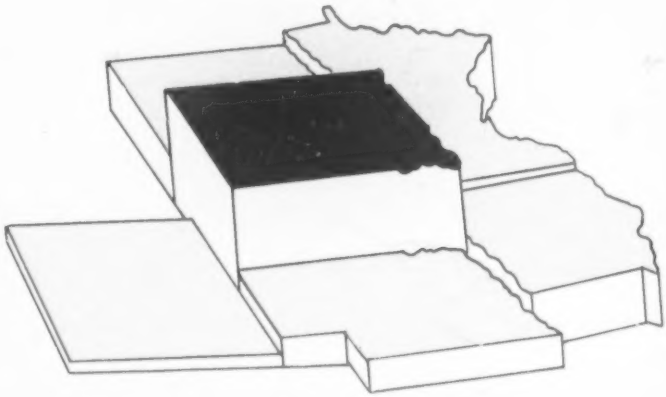
SOUTH DAKOTA Data Supplement

November 1988
Vol. V, No. 5



Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA RETAIL SALES CONTINUED TO OUTPERFORM NATIONAL RETAIL SALES—JULY-AUGUST BIMONTHLY RETAIL SALES INCREASED BY 5.7%
* RETAIL SALES SHOWED GROWTH OF 6.2% IN COUNTIES OF TOP TEN CITIES
* RURAL COUNTIES' RETAIL SALES GROWTH DECLINED TO 4.6%

by
Jeff M. Peters

The state's retail sales performance in the July-August bimonthly reporting period was stronger than the national performance. In total, the state's growth rate was 5.7% versus the national growth rate of 5.1% from the previous year's bimonthly. The best performance took place in the general merchandise sector which increased by 15.3%. The retail sales growth which South Dakota has been experiencing in the past year has been quite robust even though the rate of growth declined by 1.8% from the previous two bimonthlies.

Retail sales increased by 6.2% in the counties of the ten largest cities. The performance by SIC segment showed department and variety store sales up by 17.8%. This segment continues to be a major contributor to the strong retail performance in the larger counties. In the July-August bimonthly, sales in food stores were down −5.1%, apparel and accessories gained 2.7%, furniture sales gained 7.9% and eating and drinking sales increased by 5.5%. In the services sector, hotels and motels gained 4.0% and personal services were up 2.1%. Motion picture receipts increased 30.9% while amusement and recreation gained 11.6%.

Minnehaha led the two largest counties with an increase of 9.9% versus the 4.4% increase in Pennington county. In these two counties, the sales of general merchandise grew by 17.8% and automotive dealers and gasoline service stations increased by 12.4%. Furniture sales increased by 7.9%. Grocery store sales declined by −5.1% from the previous year's bimonthly. The other eight of the top ten counties did

SOUTH DAKOTA OUTLOOK

by Trent Stowater

The South Dakota Econometric Model shows a below normal growth rate for South Dakota in the next couple of years. All the variables shown are growing slower than normal in the forecasted period except for farm income. Farm income for 1988 is decreasing and shows almost no growth for 1989.

Total employment for South Dakota should increase through both 1988 and 1989, but the changes will be small. The outlook for nonag employment looks the same as total employment with small increases in both years. The unemployment rate for South Dakota, which is forecasted at 3.9% for 1989, is close to the natural rate of around four percent for South Dakota.[1]

not experience double digit growth in the major areas except in automobile repairs. Grocery store sales in these counties increased by 4.2%.

In the more rural counties, sales grew 4.6% in the July-August bimonthly. Sales performance in these counties continued to weaken since the peak in January-February of 9.0%. General merchandise was up 6.6% in the July-August bimonthly while both the food stores sector and the apparel and accessories declined by −1.4% and −4.6% respectively.

National retail sales increased at a rate of 5.8% for the September-October bimonthly—up 0.7 percentage points from the July-August reporting period. The national index of consumer sentiment for the period increased from 93.0 in July to 97.3 in October.

SOUTH DAKOTA
Data Supplement

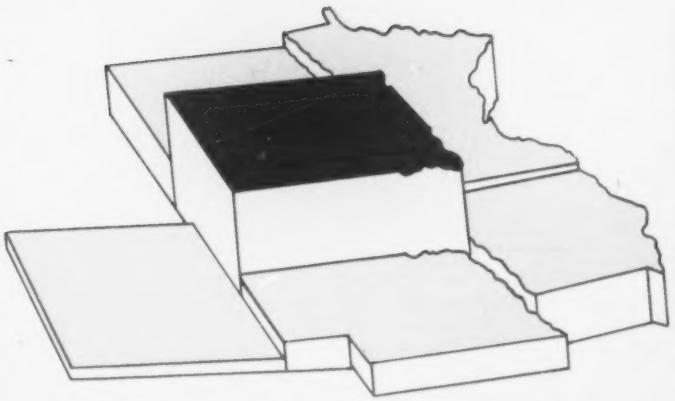
January 1989
Vol. V, No. 6



Published by Business Research Bureau, The University of South Dakota

- **SOUTH DAKOTA RETAIL SALES IN SEPTEMBER AND OCTOBER INCREASE 4.2% OVER SAME PERIOD IN PREVIOUS YEAR**
- **RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN 5.7%**
- **THE MORE RURAL COUNTIES GAIN A SCANT 0.7%**

By Randall Stuefen

The state's retail sales increase of 4.2% in the September-October bimonthly period fell short of the national growth rate of 6.1%. This is the first time South Dakota's sales have trailed the nation's since the first bimonthly reporting period of 1988. All South Dakota retailers did not share equally in the slowdown. Minnehaha and Pennington counties reported gains of 6.2% which narrowly exceeds the national rate. The remaining eight of the top ten counties scored gains of 4.8%. Growth in the remaining counties was 0.7%.

The effects of drought would appear to be showing more in rural counties. The "urban" top ten counties had a drop in sales performance of only one-half of a percentage point. In contrast, the "rural" counties' drop in performance was nearly four percentage points from 4.6% to 0.7%.

But, the performance difference between the two groups wasn't on mainstreet. The retail sale of "goods" or tangible personal property increased 2.9% in the urban centers and 3.6% in the more rural areas. The urban areas had a 5.2% increase in sales of services while the rural counties gained 4.6%. Shopping performance for goods and services through the mall and mainstreet retail outlets doesn't explain the difference in performance.

Continued on page 3.

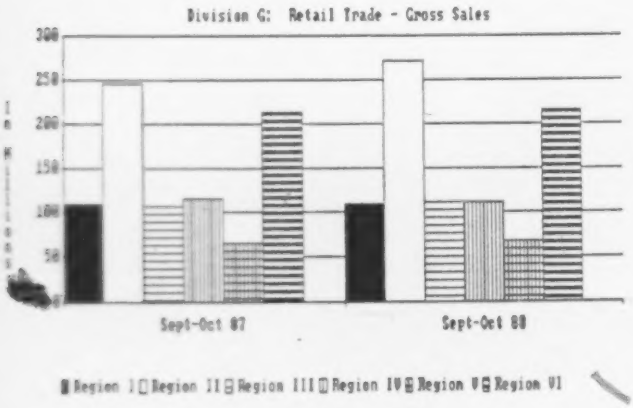
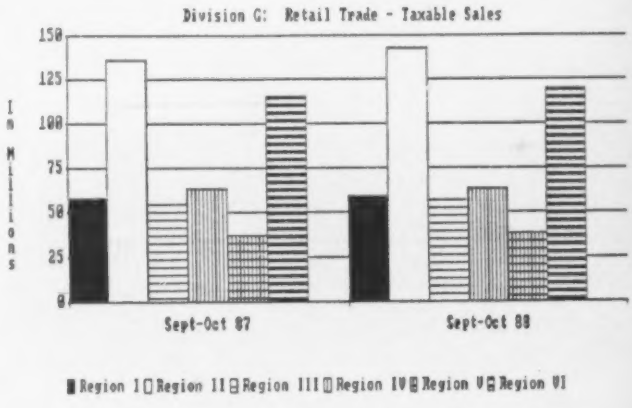
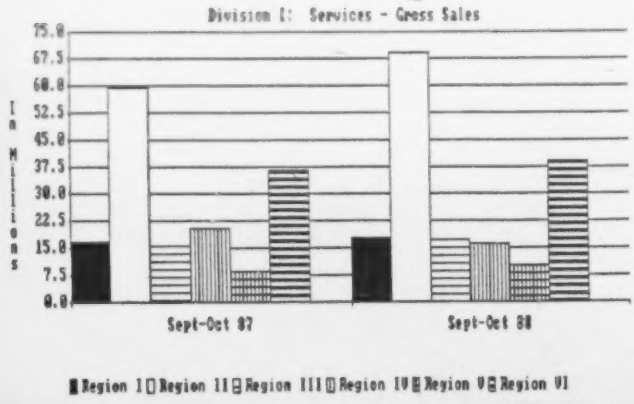
The opinions expressed by our contributors may not be those of the Business Research Bureau, the School of Business, or The University of South Dakota. **The South Dakota Data Supplement** attempts to stimulate and inform but not to convert readers to any particular viewpoint.

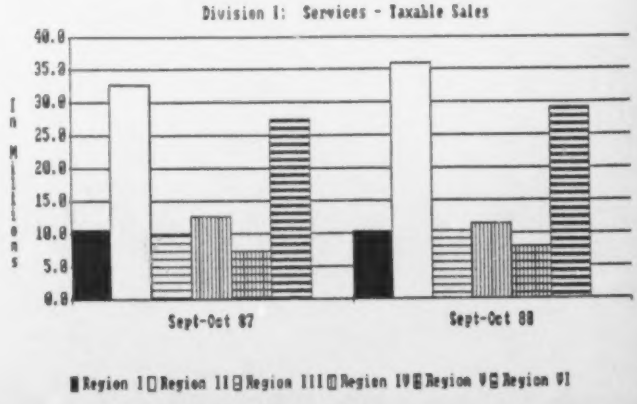
Subscription price of $6 per year. Bulk postage paid to Vermillion, South Dakota 57069. Published bi-monthly in January, March, May, July, September, and November.

Any material in the **Supplement** may be reproduced if credit is given.









A large portion of the difference is explained in three categories: construction, manufacturing and wholesale trade. All three areas are important sources of retail sales. Construction for the urban counties was down −2.5%, but it was down −35.8% in the rural counties. Manufacturing retail trade was up an incredible 59.5% in urban areas and a respectable 11.0% in rural areas. Wholesale trade in the urban counties was up 15.0% and down −28.7% in the rural counties. Economic diversification makes a difference in South Dakota retail sales.

The farm community appears to be putting big projects on hold. The early estimates from the U.S. Bureau of Economic Analysis (BEA) provide some insights. South Dakota farm proprietors' income in the third quarter of 1987 was 636 million dollars of which 178 million was government subsidy. Third quarter 1988 farm proprietors' income is estimated at a negative 63 million dollars even after receiving an increased government subsidy of 190 million dollars. The big projects were put on hold but smaller retail items were moving. (See table below)

There is an optimism in the continued sale of smaller items that was not present during the previous farm crisis. The drought, it appears, is not perceived as an influence that requires readjustment of daily lifestyles—only major purchases. The next bimonthly reporting period includes the Christmas shopping season. Performance in that period will show more about how the farm community perceives the adversity of the drought.

For the top ten counties, building material sales were down slightly (−0.3%) and furniture sales were flat (0.4%). General merchandise stores enjoyed a 14.1% sales increase. Food sales were down −2.9%. Receipts from eating and drinking were up 4.0%. Apparel and accessories increased 5.3%. Hotel and motel services were up 6.5%. Personal services fell −8.5%. Business services fell nearly −10%. Motion picture ticket sales increased over 30%.

The counties, other than the top ten, had gains in building materials, general merchandise, apparel and accessory, and food of 2.0%, 7.5%, 9.4% and 0.9%, respectively. Furniture sales were up 11.9%. There was a sales increase of 6.9% for eating and drinking establishments. Hotel and motel receipts were up 9.7%. Personal services were down −7.1% and business services were down −22.0%. Motion pictures receipts increased 23.3%.

National retail sales increased at the rate of 8.8% for the November-December bimonthly, up 2.7 percentage points from the September-October reporting period. The national index of consumer sentiment for the period decreased from 97.3 in September to 93.0 in November.

SOUTH DAKOTA
Data Supplement

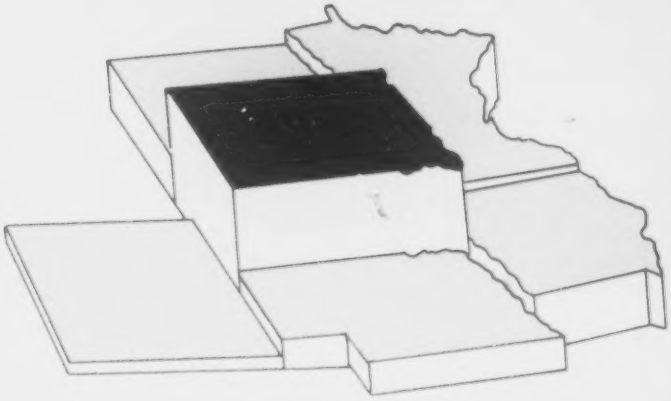
March 1989
Vol. VI, No. 1



Published by Business Research Bureau, The University of South Dakota

* **RETAIL SALES IN THE CHRISTMAS MONTHS OF NOVEMBER AND DECEMBER WERE UP 8.0% FOR SOUTH DAKOTA'S RETAILERS**
* **RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN 8.0%**
* **THE MORE RURAL COUNTIES GAIN 8.0%**

By Randall Stuefen

The state, the counties of the top ten cities, and the rural counties all averaged an 8.0% increase in their Christmas season receipts. A very powerful finish for the 1988 retailing year in the urban and rural communities is a positive indication that farmers perceive the drought as a temporary setback and not as a long-term financial limitation.

The counties containing the largest cities, Minnehaha and Pennington, reported increases of 8.7% and 6.3%, respectively. The counties showed strengths across the retail sectors. Building materials were up 9.8%. General merchandise stores were up 10.9%, and the apparel and accessory stores gained 8.4%. Furniture sales were up 11.2%. Eating and drinking receipts increased 5.3%, while grocery store sales were down 1.5%. Hotel and motel services rose 8.0%. Personal services and business services dropped 0.9% and 10.8%, respectively.

Of the top ten counties, Davison and Yankton counties led in the increases with performance in excess of 15 percent. Brookings county trailed only slightly with an increase of just over 14%. What do these counties have in common? Each scored respectable gains in the sale of goods and services in their stores and shops. However, a second common

Continued from page 1.

characteristic is each county's outstanding performance in the manufacturing sector. Gains in taxable retail sales for manufacturers in these counties were 584% in Brookings, 77.4% in Yankton and 353% in Davison counties.

The counties other than the top ten reported increases of 6.8% in the sale of goods and 7.7% in the sale of services. Construction remained slow with a 42.6% drop in retail sales. The mining sector reported a gain of 52.1% and manufacturing was up a strong 75.0%. On mainstreet, building materials were up 4.1%. General merchandise was up 3.6% and apparel and accessory was down 1.1%. Furniture sales reported gains of 21.2%. Eating and drinking establishments gained 4.9% while grocery sales increased 10.2%. Hotel and motel services increased 1.0%. There was an 11.6% increase for business service sales. Motion pictures and amusements scored dramatic increases of 30.4% and 44.0%, respectively.

National retail sales increased at the rate of 7.0% for the January-February bimonthly. The national index of consumer sentiment for the period increased from 93.0 in November to 97.9 in January.

SOUTH DAKOTA OUTLOOK
By Trent Stowater

The South Dakota Econometric Model estimates that real personal income growth was negative in 1988. Real personal income is made up of two components, nonfarm income and farm income. Nonfarm income in 1988 showed some growth but farm income, due to the drought, decreased approximately 49% from 1987. The forecast model assumes normal weather for 1989. Nominal farm income is expected to be substantially higher than 1988 and slightly higher than 1987. Real farm income is projected to be higher in 1989 than 1988 but slightly lower than 1987. With this, the model projects real personal income to grow around 8% in 1989.

Total and nonagricultural employment both showed little growth for 1988 and the same is expected for 1989. Total employment increased .9% in 1988. The model projects an even smaller growth of .7% in 1989. Nonagricultural employment displayed a slightly higher growth rate of close to 2% in 1988 and an estimated 1% in 1989. The unemployment rate for South Dakota in 1988 was 3.8%; this is a decrease from 1987. In 1989, the model projects the unemployment rate to increase to 4.2%. This is the same level as in 1987.

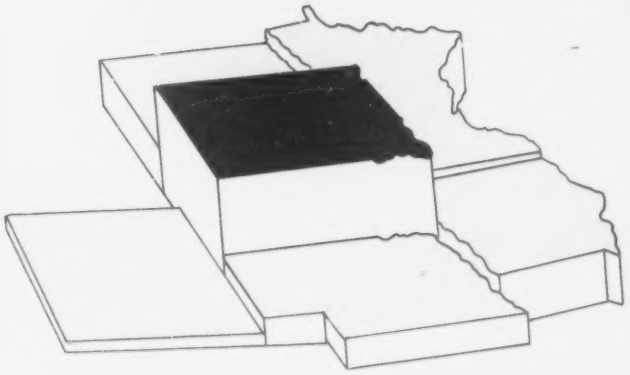
SOUTH DAKOTA Data Supplement

May 1989
Vol. VI, No. 2



Published by Business Research Bureau, The University of South Dakota

*** SOUTH DAKOTA RETAIL SALES IN JANUARY-FEBRUARY 1989 INCREASE 8.9% OVER SAME PERIOD IN PREVIOUS YEAR.**

*** RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN 10.5%.**

*** THE MORE RURAL AREAS GAIN 5.1%.**

By Randall Stuefen

The state and the counties of the top ten cities continued a strong showing in the January-February bimonthly, averaging 8.9% and 10.5% increases, respectively. This tops the solid 1988 finish of 8.0% resulting from Christmas season receipts. Once again, South Dakota's sales surpassed the nation's growth rate of 7.1% this period. The sales of services decreased 8.1% in the top ten counties, and total taxable retail sales increased 7.5%.

Rural counties are continuing to show the effects of the drought. The average increase was 5.1%, down nearly three percentage points from 8.0% in the November-December reporting period. Furniture and general merchandise sales gained 21.3% and 18.3%, respectively. Motion picture receipts were up 25.8%, while amusements and recreation gained only 0.4%. Sales in food stores were up 3.5%, apparel and accessory increased 0.2%, and eating and drinking receipts increased by 3.7%.

The counties of the top ten largest cities with the greatest increases are Minnehaha (16.5%) and Brookings (13.4%). These counties continued strong in the retail sector. Building

Continued from page 1.

materials were up an average of approximately 28% for both counties. General merchandise sales increased 75.2% in Minnehaha county and 12.0% in Brookings county.

In the counties containing the two largest cities, Minnehaha and Pennington, there were similar strengths in the retail sector. Building materials increased 18.5%, and general merchandise increased 27.0%. Food store receipts were down −1.1%, apparel and accessory sales gained 15.5%, and furniture sales increased 19.8%. Motion picture receipts were up 35.6%, while amusement and recreation gained 11.6%.

National retail sales increased for the January-February bimonthly, up 7.0% from last period. The national index of consumer sentiment for the period decreased from 97.9 in January to 94.3 in March 1989.

SOUTH DAKOTA OUTLOOK

By Trent Stowater

The outlook for South Dakota as predicted by the South Dakota Econometric Model shows a recovery year in 1989 and below normal growth in 1990. The estimate for real personal income reveals a 7.4% growth in 1989. The growth of real personal income in 1990 is estimated at 1.4%. The substantial increase in personal income in 1989 is a reflection of a large growth in farm income. Currently, the model projects a recovery from the drought of 1988 with a 93.2% increase. For 1990, the model is forecasting a very modest decrease of 1%. Nonfarm personal income is also contributing to the growth of personal income in 1989 with a 2% improvement over 1988. The model anticipates an increase of 1.7% in nonfarm income in 1990, slightly below 1989 estimate.

employment is estimated to grow 1% in 1989. The model forecasts almost no growth in 1990 with a 0.3% increase over 1989. The nonagricultural employment displays slightly more growth in both years—a 1.2% and 0.6% increase in 1989 and 1990, respectively. Along with this growth in employment, the model is estimating a higher unemployment rate in 1989 and 1990. The model anticipates the level of unemployment in South Dakota to be at 4.2% for 1989 and 4.5% in 1990. This represents a 0.4% and a 0.3% increase in 1989 and 1990, respectively.

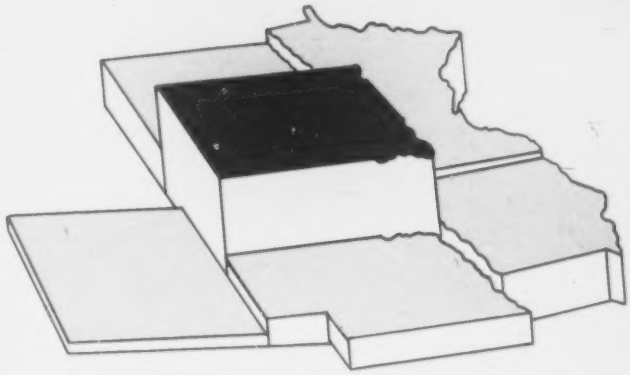
SOUTH DAKOTA Data Supplement

August 1989
Vol. VI, No. 3



Published by Business Research Bureau, The University of South Dakota

*SOUTH DAKOTA RETAIL SALES INCREASE 2.7% IN MARCH-APRIL BIMONTHLY.

* RETAIL SALES IN COUNTIES OF THE TOP TEN CITIES GAIN 2.7%.

* THE MORE RURAL COUNTIES GAIN 2.8%.

By Toni Johnson

The state and the counties of the top ten cities made weak gains in the March-April bimonthly, both increasing an average of 2.7%, the smallest increase in the last year. Retail sales in the more rural counties fared slightly better, increasing 2.8%. South Dakota's sluggish sales reflect a nationwide softening in the economy. National retail sales increased 6.2% in March-April, which is down from the 7.9% reported in January-February.

South Dakota's construction industry is experiencing a slowdown. Statewide, construction retail sales decreased 10.4% from the same period last year. In the "urban" counties of the top ten cities, construction decreased 7.3%. The more rural counties experienced a decrease of only 0.2%. Construction by "other" entities was down 13.1%. These other entities consist of consolidated businesses, out of state businesses operating in South Dakota, and some public utilities. High interest rates may be part of the reason for this slowdown.

Among the counties of the top ten cities, only Brookings county reported an increase (7.0%) in taxable retail sales greater than the national average. Codington county reported the second largest increase at 5.3%. In the "top ten" counties sales of building materials were down 4.7%. General merchandise sales
